A GLOBAL RETURN TO SOURCE

A shared vision for a world that respects and values water.

Since our founding in South Africa in 2009, Topia has been driven by a simple desire, to respect, preserve, and enhance water. We believe that great-tasting water shouldn't cost the Earth.

Rather than relying on imported, pre-packaged bottles, we engineer premium circular water ecosystems using the highest quality materials with minimal environmental impact. To uphold these stringent quality credentials, our Go range is proudly manufactured in Europe. This ensures homeowners and leading brands are empowered to serve flawlessly polished local water while completely eradicating single-use plastic waste.

Over the last two decades, our commitment to this vision has driven our expansion across Africa and the Middle East. Now, as we introduce Topia to North America, our global purpose remains the same, to elevate water, reduce our footprint, and return to the source.

GREAT TASTING WATER SHOULDN'T COST THE EARTH

Chilled, Sparkling, And Boiling Water

Water is essential to life, nourishing and cleansing everything it comes into contact with. The Topia Go range complements this with a premium in-home filtration solution designed for clarity, taste, and control.

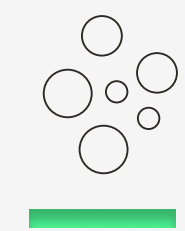

- Removes bacteria, pesticides, microplastics, and added chemicals from municipal water
- Reduces the usage of single-use plastics
- Switches seamlessly between municipal and filtered water to protect your filter
- Delivers over 2L of chilled or sparkling water, or more than 3L of boiling water instantly
- Offers diagnostics, temperature and carbonation control, and product updates, all from one intuitive app

EVERYDAY LUXURY, THOUGHTFULLY DESIGNED

Add Refinement To Your Home

The Topia Go replaces single-use plastics and needless clutter with seamless, in-home filtration that feels as considered as it looks.

Every feature is designed with tailored flexibility and convenience in mind, allowing you to input the volume of your favourite glass, customize your carbonation for that perfect sparkling fizz, and refill your reusable bottles with clear, refreshing water at the perfect temperature.

The Topia Go system is intelligently engineered for modern living, with smart features that let you fine-tune energy use and switch between regular tap water and polished filtered water effortlessly. Using the Topia App, you can activate Holiday Mode while away, track water output, and reduce wastage.

Perfect your home's most essential ritual — water.

PREMIUM DESIGN

This meticulously crafted faucet becomes a central hub for your kitchen, and elevates your hosting with five stylish finishes – Matte Black, Brushed Stainless, Brushed Brass, Polished Nickel and Polished Chrome.

The Topia Go is designed to fit seamlessly into any kitchen design. It effectively removes clutter and noise, replacing kitchen appliances like kettles and sparkling water machines with a single quiet, unobtrusive, all-in-one faucet with smart electronic controls.

Your filter and gas bottle – for carbonation – are placed under the counter, connected to water and electrical points out of sight to keep the lines of your kitchen clean and pristine.

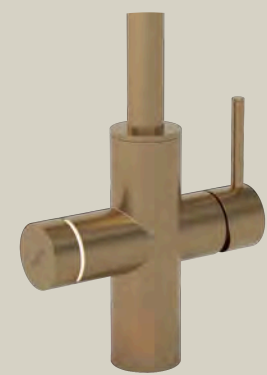

The Go system fits easily into most kitchen counters. This allows for easy installation, filter replacement, and maintenance.

GO & GO EDGE

We are please to offer two versions of our Faucet- The Go and Go Edge.

The Go faucet is a full size primary faucet designed to fully replace traditional kitchen hardware, it comes in 3 spec levels and includes the ability to mechanically switch between filtered drinking water (ambient, boiling, chilled & sparkling) and the standard mains water supply.

The Go Edge is a compact option perfect for existing kitchens, and is easily placed alongside the standard faucet, or used as a smaller faucet option for dedicated beverage sinks. The Go Edge offers all the same options and functionality of the larger Go faucet without the mechanical override of the filtration system to the mains water supply.

The Go & Go Edge both come in the same five stylish finishes – Matte Black, Brushed Stainless, Brushed Brass and Satin Gunmetal, and uses the same undercounter system to deliver perfectly polished drinking water.

ELEGANT ENGINEERING

The Topia Go works with a unique Topia Luxe Filter that uses particle filtration, ion exchange, and activated carbon absorption to remove Microplastics, harmful toxins, odours, contaminants, and hard-water sediments, leaving behind great-tasting, refined water.

The Topia Go is the most compact, quietest system on the market, built to be unobstructive, convenient, and stylish with features like:

- Smart electronic controls with programmable features
- A standard municipal water option for ambient and hot tap water that preserves your filter for what really matters – great-tasting water.

The Topia Go also automatically flushes the previous water type from the faucet as you use it, so you're never dispensing still or hot water with any lingering carbonation.

topia:

Microplastic Removal

High performance particle filter fleeces to catch suspended solids and particle matter, such as sediment and microplastics.

Activated Carbon Absorption

Different grades and combinations of activated carbon components reduce chlorine, organic compounds, and improve the taste and odor of your water.

Ion Exchange

Ion exchange resins reduce carbonate hardness and heavy metals, preventing mineral build-up and preserving the performance of your system.

EFFORTLESS ADJUSTMENT

Your Water, Designed By You.

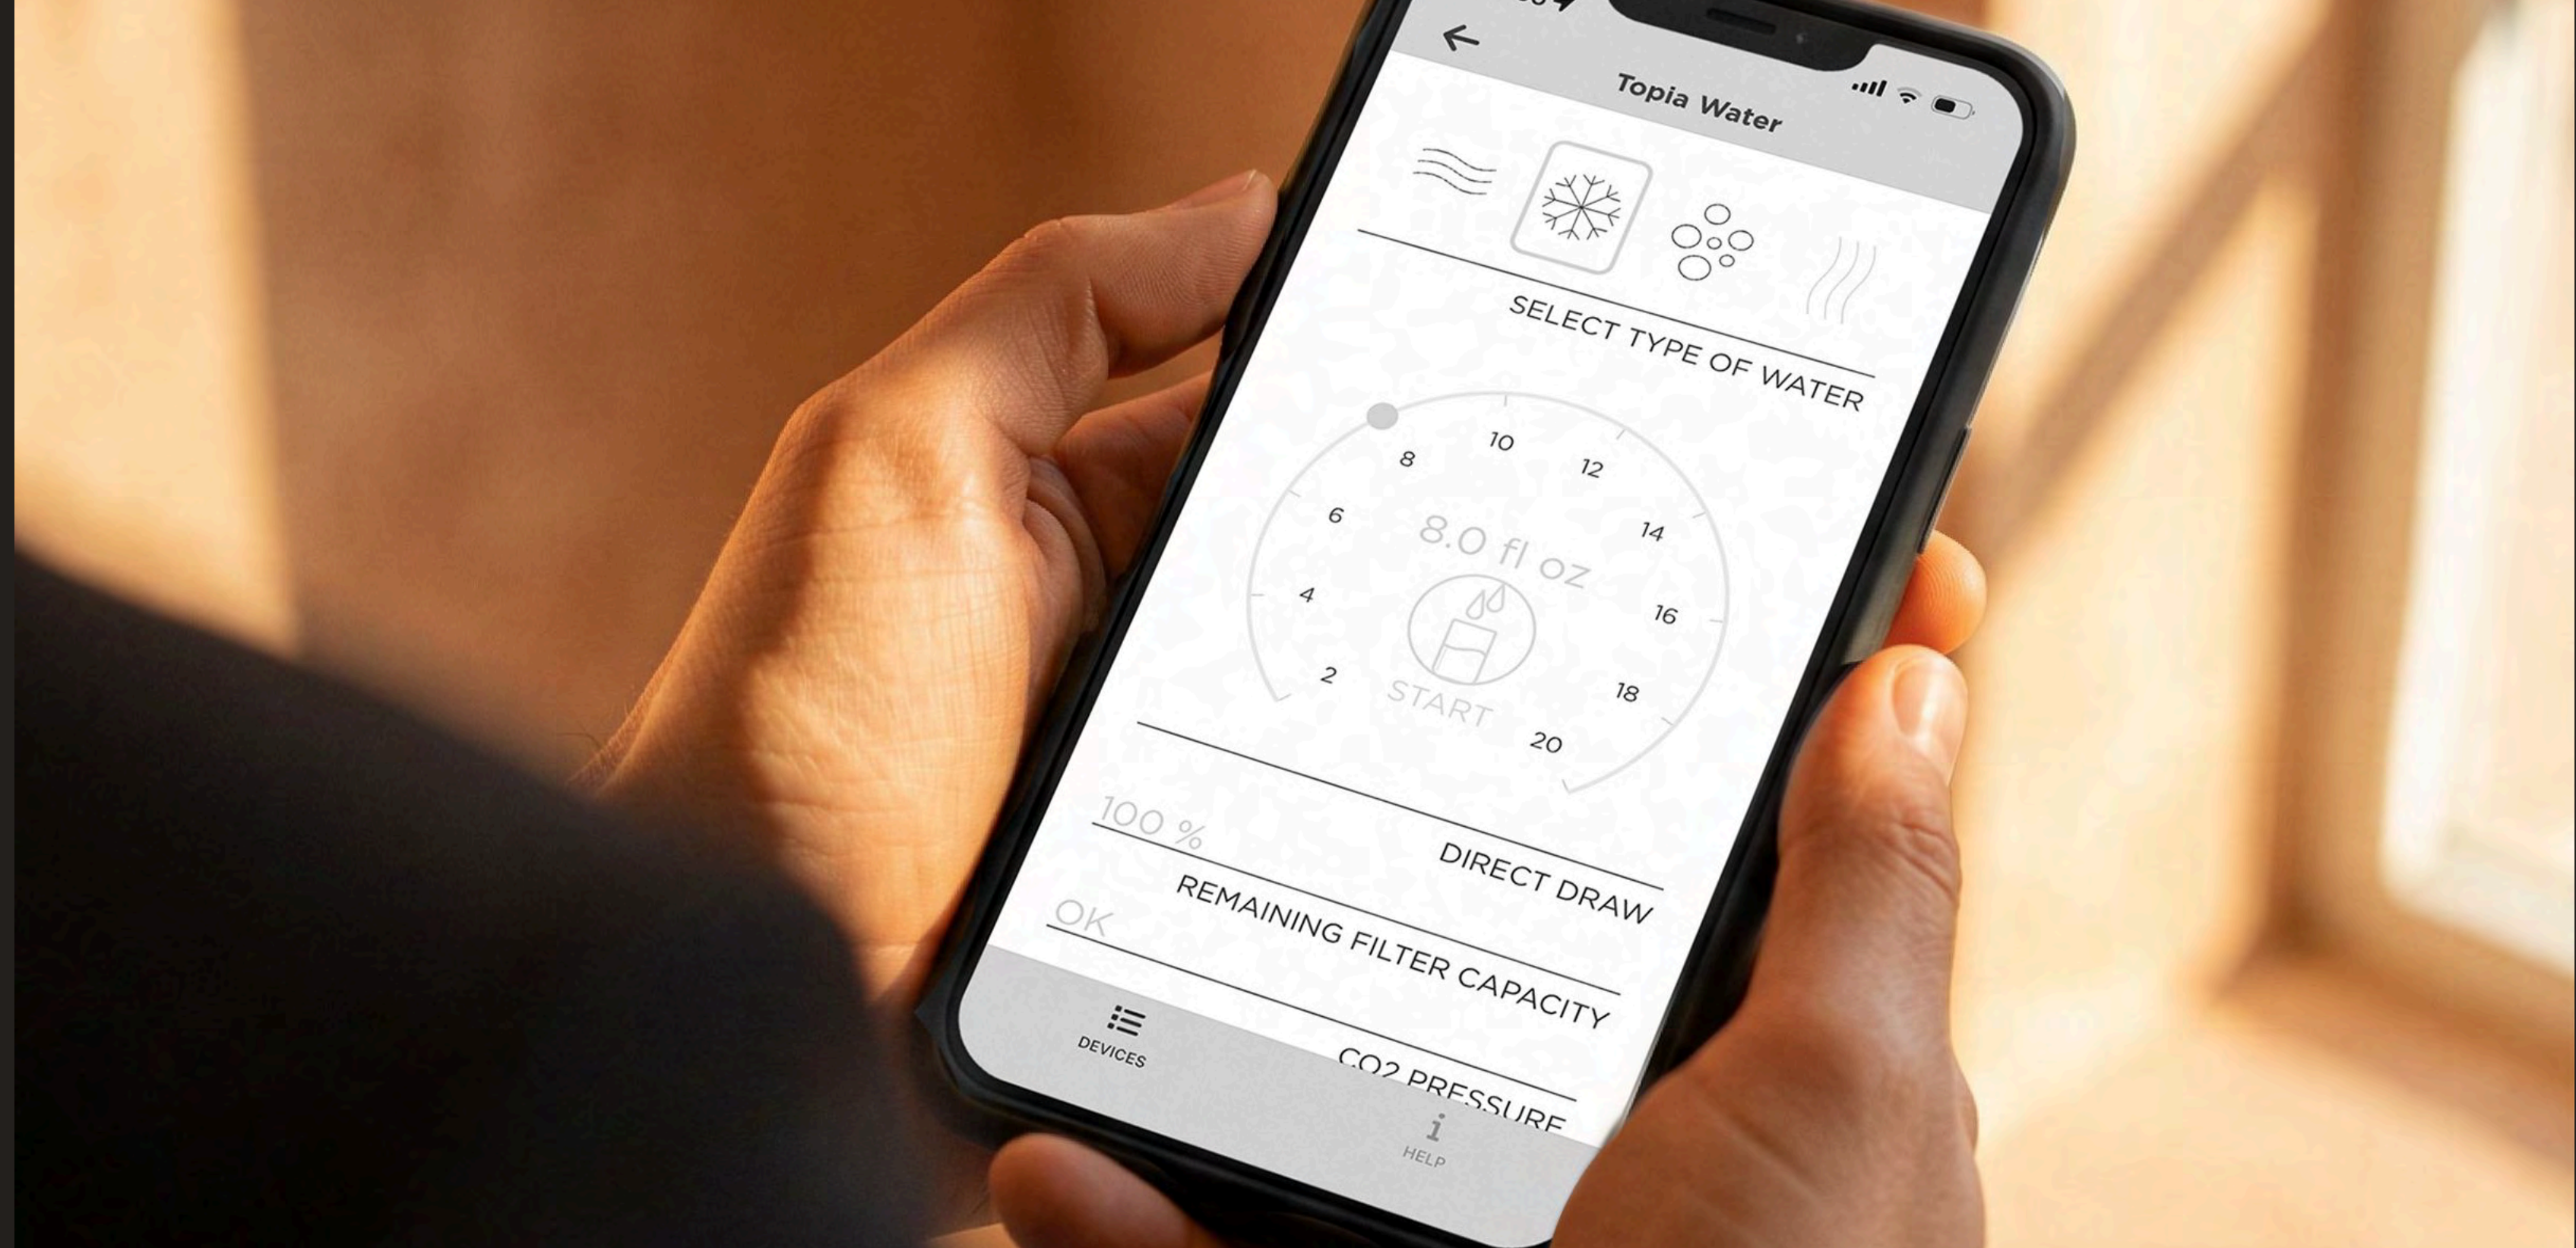

Enjoy unlimited amounts of chilled, ambient, boiling, or sparkling water, all from one faucet. Topia's intuitive app connects to your faucet and enables you to customize your water, making this a truly bespoke hydration experience.

- Adjust the temperature of your chilled and boiling water, as well as the sparkling intensity.
- 3 Pre-set portion controls for every water type
- Display the status of your CO₂ cartridge and filter, including service notifications
- Track statistics

Add the right amount of sparkling water to your glass, refill your favourite reusable water bottle with refreshing chilled water, or set your boiled water preference based on your most-used mug.

In your home, taste is paramount.
Your water should reflect that.

FIND AN OPTION THAT WORKS FOR YOU

The Topia Go range features three options to suit your needs.

TOPIA GO 1

The simplest option, the Go 1 features settings for Boiled and Ambient water.

This model can boil and maintain the temperature of over a gallon of boiling water, making it ideal for cold-weather entertaining with warm drinks. This faucet lacks Bluetooth connectivity, making it ideal for those who prefer manual control.

TOPIA GO 2

This cool-water faucet uses significantly less energy than boiling water models, making it a great choice for energy-conscious homeowners.

This model has a max energy consumption of 230W, and a Holiday Mode consumption of just 2W. That means when you're away on vacation, your Topia system uses less power than a night-light.

With the Go 2, you have access to Chilled, Ambient, and Deep Sparkling water whenever you like, adjustable via the Topia App.

TOPIA GO 3

This is our most comprehensive model, for those who want an all-in-one option for their Chilled, Ambient, Boiling, and Deep Sparkling water.

With the Go 3, you have more choices, more capacity, and more flexibility. Control the temperature of your boiled water within a range of 60 - 98.8°C, customize your carbonation for the perfect Deep Sparkle, and chill your water to that just-right icy temperature – all from the Topia App.

THE TOPIA PROMISE DOESN'T END WITH INSTALLATION

Our expert service partners are ready and waiting to help. Our partners offer easy after-service support to help you maintain your filter and Topia Go system.

You can reach our knowledgeable support team quickly through the Topia app, where you'll also find easy access to service information and warranty details, so you can enjoy your Topia water system.
